

Michelle

California University

StudentStats

Hometown: Riverside, California
Major: Technical journalism
Year: Senior

What had the biggest impact on your decision to attend your school?

California University offered me more scholarships than any other school.

What has been the best thing about college so far?

I have really enjoyed getting to know my professors, my classmates, and myself! It just keeps getting better and better.

Do you participate in any activities or organizations?

I am a member of student government, the honor society, and the Leadership Development Institute. I also volunteer at the local food bank every week, and I enjoy the annual university-wide food collection drive.

Where is your favorite place to hang out on campus?

My friends and I like to go play cards at the Condor Lounge in the student center.

What is your favorite campus-wide event?

I always look forward to basketball season. Lady Condors games are so much fun!

Who is your favorite faculty member and why?

My favorite professor is Dr. Burke. Not only is she a great journalism professor, but she is also a professional reporter for the local news station. I trust her experience and appreciated her advice, but her tests are hard!

Q: Do you have any advice for future students?

A: Don't let the first few days of classes overwhelm you.

What is your favorite class and why?

I love all my classes, but my favorites are the ones that have to do with my major, technical journalism. In my program, we have the opportunity to learn by doing, not only by taking notes and listening to lectures. This makes every day more interesting, and I always feel like I am getting the most out of my education.

What are your plans after graduation?

In the future, I would like to own a production company that provides clean, high quality movies and television programming.

Do you have any advice for future students?

Don't let the first few days of classes overwhelm you. College might seem intimidating at first because it is so much different than what you're used to, but if you give it time, you will see how great it really is!
